(54) Title: ANTENNA ARRAY AND METHOD, PARTICULARLY FOR OPERATING THE SAME

(54) Bezeichnung: ANTENNENANORDNUNG SOWIE VERFAHREN INSBESONDERE ZU DEREN BETRIEB

(57) Abstract: An improved antenna array comprises the following features: a network (17) is provided by means of which at least two radiator groups (3.1, 3.2) are provided with a signal (A_{in1} , A_{in2}) having an amplitude that can be adjusted relative each other. The network (17) comprises a phase adjustment device (21, 121) by means of which a supplied input signal (PS_{in}) having the same intensity but different phase position can be divided up relative each other into two output signals (PS_{out1} ; PS_{out2}). The array is further provided with a hybrid circuit (19, 119) by means of which the output signals (PS_{out1} , PS_{out2}) can be converted into hybrid output signals (H_{out1} , H_{out2}) which have a predefined phase position relative each other and whose amplitudes differ depending on the different phase positions in the phase adjustment device (21, 121).

(57) Zusammenfassung: Eine verbesserte Antennenanordnung weist folgende Merkmale auf: es ist ein Netzwerk (17) vorgesehen, worüber zumindest zwei Strahlergruppen (3.1, 3.2) ein Signal (A_{in1} , A_{in2}) mit relativ zueinander verstellbarer Amplitude zuführbar ist, das Netzwerk (17) umfasst eine Phasenverstelleinrichtung (21, 121), worüber ein zugeführtes Eingangssignal (PS_{in}) mit gleicher Intensität aber unterschiedlicher Phasenlage relativ zueinander auf zwei Ausgangssignale (PS_{out1} ; PS_{out2}) aufteilbar ist, und dass ferner noch eine Hybridschaltung (19, 119) vorgesehen ist, worüber die Ausgangssignale (PS_{out1} , PS_{out2}) in Hybrid Ausgangssignale (H_{out1} , H_{out2}) wandelbar sind, die eine fest vorgegebene Phasenlage zueinander aufweisen und deren Amplitude in Abhängigkeit der unterschiedlichen Phasenlagen in der Phasenverstelleinrichtung (21, 121) voneinander differieren.

INTERNATIONAL SEARCH REPORT

International Application No
PCT/EP2004/008800

A. CLASSIFICATION OF SUBJECT MATTER

IPC 7 H01Q25/00 H01Q3/30 H01Q3/40 H01Q1/24

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 H01Q

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	US 5 115 248 A (ROEDERER ANTOINE) 19 May 1992 (1992-05-19) column 2, lines 28-46 column 8, line 37 - column 9, line 14; figures 5,22	1-28

☒ Patent family members are listed in annex.

* Special categories of cited documents:

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

T later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

X document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

Y document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.

Z document member of the same patent family
